Dodballapur water Supply

The question of water supply to the Dodballapur town which was under consideration of Government for some time past was first raised in the R.A Session of 1906and Government accordingly ordered the investigation of a scheme from Nagarkere tank This involved an initial outlay of Rs 46,456 and an annual maintenance charge of Rs.3,511 Considering the low financial condition of the Municipality, Government ordered in G O No 688-9 dated 7th July 1913 that it might lie over till the resources of the Municipality were improved The scheme was also objected to from a sanitary point of view All the sewage of the town was turned towards the tank

Subsequently in 1913 , the Deputy Commissioner submitted proposals suggesting that the less costly scheme of supplying water from Koneghatta tank costing Rs 34,000 with an annual maintenance charge of Rs 1000 might be sanctioned in view of the fact that the townspeople had contributed Rs 30,000 and that the balance might be met by Government as a grant-in-aid When the scheme was worked out in detail, it was found that the scheme was underestimated and that the same would cost Rs 70,000 and even one lakh As Government were not prepared to forego such a large sum to a town of secondary importance, it was also dropped and an alternative scheme of obtaining the supply either from Nagarkere tank or any

other suitable source was ordered to be investigated.

The Deputy Commissioner submitted a third project in 1915, drawn up by Mr V. Rangaswami Iyengar, Superintending Engineer, Southern Circle Viz that of pumping water from Sivapur tank. This was estimated to cost Rs 45,000 with an annual maintenance charge of Rs 3,500. When the Municipal Council were asked to submit proposals for meeting the initial and as well as recurring expenditure, they over and above the contribution made by the townspeople, they considered that even this scheme was too costly and the maintenance charges heavy A further investigation of the question was therefore considered necessary.

The subject was again pressed in the R.A. Session of 1917 and Government ~~were~~ promised to bear the whole of the initial cost if the Municipality could bear the maintenance charges. (Vide Subject No 186).

In the meantime, the Chief Engineer for Irrigation forwarded a note recommending a project for supplying water from a couple of wells sunk below the Nagarkere tank, the initial cost being Rs 35,000 and the maintenance charges amounting to Rs 3,100. This was also found objectionable from a sanitary point of view and as the ways & means suggested for meeting the mainte-

maintenance charges were also not definite, Government in their order No. 6822-4 dated 5th June 1918, called for a joint report from the Sanitary Commissioner, the Deputy Commissioner and the Executive Engineer.

Accordingly, a joint report was received and the opinion was to eliminate Sivapur, Rajaghatta and Koneghatta schemes on account of the cost involved and Palankere Jogihalli on account of its small catchment area. They finally recommended the source of supply from Nagarkere tank by sinking wells and pumping water and suggested that preliminary investigations might be undertaken by sinking a trial well and finding out if the yield is promising and the water potable.

From the reference now received, it will be seen that the available source is an infilteration gallery below the tank at site marked "A" in the sketch where the yield of water is sufficiently large. But the sanitary opinion as regards the suitability of the water for human consumption, is that it cannot be made potable.

In these circumstances, orders of Government have been sought for.

Sub[2] for perusal

There seems to be no way out of the difficulties which are met with in every direction. The reply of the Public Health Dept[t] regarding as to whether the water in question can be made potable, may perhaps be awaited, though the chances of a favourable reply are remote.

It may be necy in the end to resort to the old system of sinking wells in the town, with which it will have to be content.

REV SECRETARIAT I REVENUE. 2 OCT 1918 D5078 To

From

S. Cadambi, Esq.,
Chief Engineer for Irrigation,
Bangalore

To

B. Ramaswamaiya, Esq., B.A , B L ,
Secretary to the Government of Mysore,
Revenue Department, Bangalore

Sir,

I have the honour to acknowledge the receipt of a copy of the notes of joint inspection of Dodballapur by the Sanitary Commissioner, the Deputy Commissioner and the Executive Engineer, Sanitary Division, made in pursuance of the orders conveyed in G O.No.6822-4/M1 194-14-15 dated 5th June 1918, forwarded with your letter No 3586/M1 194-12-28 dated 3rd September 1918

2 It seems to have been decided at the joint inspection that the yield from a few wells sunk in the bed of the Nagarkere tank may be tried before preparing any detailed estimate for a pumping scheme

3 An estimate amounting to Rs 2,760 for sinking two wells in the bed of the tank prepared by the Executive Engineer, Sanitary Division, is herewith submitted, for orders of Government, together with a copy of his letter No 469 dated 26th July 1918

The cost of the estimate has to be borne by the Municipality but no reply is stated to have been received from the Deputy Commissioner in this matter

4. On receipt of orders of Government on the estimate as regards the source from which the cost is to be met, the work will be

put in hand completed, and the result reported to Government.

I have the honour to be,

Sir,

Your most obedient servant

Chief Engineer for Irrigation.

hr

31

Letter No 469 dated the 26/29th July 1918 from the Executive Engineer, Sanitary Division, to the Superintending Engineer, Southern Circle, Bangalore.

"Water Supply to Doddaballapur Town"

I have the honour to inform that as desired in your D O.No.118 dated 3rd July 1918, I met the Deputy Commissioner of Bangalore District and Sanitary Commissioner at Doddaballapur on the 8th instant and discussed with them and the Townsmen

2 It was decided that, there being no source which commanded the whole town by gravity, only a pumping scheme was possible Nagarkere tank near the town was selected as the source. This tank is in the main Arkavathi valley, has a catchment of 3.19 sqr miles and an atchkat of 101 2 acres

3 It was proposed to sink two trial wells, one in the bed of the tank on the right flank and another in the deepest bed of the valley below the bund. If, on testing, the quality and the quantity of water were both satisfactory, detailed estimates might be prepared. If the yield is not satisiactory, the tank will have to be reserved and a certain amount of water stored in the tank, when the wells are sure to contain water

4 An estimate for sinking two wells of 6 feet diameter and 50' deep for testing the yield is herewith submitted for favour of very early ~~early~~ sanction Even if the yield is not satisfactory, the wells will continue to be useful for supplying the town

5 The Sanitary Commissioner has [illegible] bility of sending a report to Government in response to the Government Order No.6297/Mi.194-14-5 dated 26th February 1916

6 I may mention that Jogappanahalli tank, recommended as a source of supply in the Government order, has an independent

32

catchment of only 3.75 sqr. miles and cannot be relied upon to supply the town. Also, it is lower than the town as shown by the levels below -

Cill of sluice.	90.40
Intermediate ridge..	144.58
Highest point in the centre of the town.,,.118 00

CENTRAL OFFICE.

Bangalore, 22nd July 1919

From

S. Cadamba, Esquire,
KARUR SRINIVASA AYYANGAR, Esquire,
Chief Engineer of Mysore,
Secretary to the Government of Mysore,
Public Works Department

To

B Ramaswamaiyya, Esq., B A., B L.,
Secretary to Government,
Revenue Department,
BANGALORE

Sir,

With reference to your letter No. 12098/Fl.100-18-4 dated 21st March 1919, calling for a report as to the result of the experiments made in connection with the yield of water in trial wells sunk in the bed of Nagarkere tank for the supply of water to the Doddaballapur town, I have the honor to forward the accompanying report received from the Executive Engineer, Sanitary Division

2. Orders of Government may kindly be obtained as to what should be done under the circumstances reported by the Executive Engineer Several schemes were investigated and reports given Government finally fixed upon this scheme for further investigation and now the Public Health Department say that the water is not potable

I have the honor to be,

Sir,

Your most obedient servant,

SUBJECT No 263

Water Supply to Dodballa pur Town

Messrs Devasettappa and Veere Gowda, Dodballapur Taluk and A Srikantappa, Dodballapur Municipality

Mr Srikantappa —The water supply project for Dodballapur was sent up to Government long ago and it was decided to be undertaken in 1917, but nothing has yet been done in the matter We have already paid Rs. 20,000 as voluntary contribution towards the cost We stand on a different footing from other places in this respect The scheme may be brought into force without further delay

Second Member of Council —The scheme which has been sanctioned already is becoming more costly day by day Your Municipality cannot bear the maintenance charges Steps are being taken to find out cheaper means of water supply The matter will be expedited
